

`std::true_type`

```
graph BT; A["detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::const_iterator >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class, containing the text `detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::const_iterator >`. A blue arrow points upwards from this box to a white rectangular box at the top, which represents the derived class and contains the text `std::true_type`. The white box is divided into three horizontal sections, with the top section containing the text.

`detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::const_iterator >`
