

std::false\_type

```
graph BT; A["detail::is_compatible< BasicJsonType, CompatibleObjectType, typename >"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class, containing the text `detail::is_compatible`, `_object_type_impl< BasicJsonType, CompatibleObjectType, typename >`, and two empty rows. A blue arrow points upwards from the top of this box to the bottom of a white rectangular box above it. The white box represents the derived class, containing the text `std::false_type` in its top row and two empty rows below it.
